EMPLOYEMENT

| **Software Developer** | **ION Trading India Pvt. Ltd.** | **Jun 2019 – Present** |

ION Treasury Anywhere – Nov 2020 - Present
- In a global scrum team of 14 people, we develop a mobile-first, responsive web application that allows ION Treasury users to connect to their treasury systems from any connected device.
- Currently, I am developing features using Typescript, AngularJS and Java 8 as the core technology stack and also contributing to other roles for the product like unit testing, UI automation testing, writing Jenkins jobs/pipelines and managing AWS.

ION Core Architecture Team (Aggregation & Reporting Component) – Jun 2019 - Nov 2020
- In a global team of 22 people, we shaped and developed ARC Reporting Suite. It is then used by other internal teams for all the products which generate and distribute reports.
- During my tenure, I developed features and components using Typescript and AngularJS as the core technology stack. Worked on migration of the product from Silverlight to HTML5. This made our product accessible to users on any modern web browser.
- While migrating to a responsive web application I took ownership of the product, understood usage/need of each component and contributed by designing UX, writing clean and maintainable code and UI automation testing.

| **Frontend Developer, Intern** | **HackSociety** |

React Developer Intern – Jul 2018 - Sept 2018
- Responsible for building a web application for the company using various tech including React & Redux

Web Development Intern – Sept 2017 - Nov 2017
- Responsible for building the new landing web page for the company and organize the portal on AngularJS..
